My Beloved Children of Light I'm your very own Divine Mother.

My gift to you is to present you with pouring the Energies of Compassion and the Sky Blue Topaz Light which is the Higher Aspect of Great Silent Watcher's Turquoise Blue Light into the world to clear and cleanse the Five Elements and make this year an easier one for all of you. We have indeed worked with Goddess of Compassion and the Energies of Compassion.

**Envision yourself standing to face Divine Mother, with Lord Shiva to one side, Goddess Shakti to the other. Five Angels come and stand in front of us holding five small containers. Great Silent Watcher, Cosmic Guardian of Compassion, Cosmic Guardian of Divine Plan and Goddess Victory are all standing in between Lord Shiva & Goddess Shakti.**

**You and I hold our hands over the five small containers, brought by the Angels which carry the 5 Elements. One has the Element of Earth, a nice dark pile of soil with a small river rock on top is in one container. A cup full of water from the oceans mixed with the fresh waters is in the second. A small container with Fire burning inside is in the third; another carries the Element of Air and the fifth carries the Element of Ether.**

Imagine that every member of the group individually stands with Divine Mother and blesses these five containers. Imagine that behind us in a crescent shape, Lord Shiva, Goddess Victory, Cosmic Guardian of Divine Plan, Cosmic Guardian of Compassion, Great Silent Watcher and Goddess Shakti. Shiva, Shakti are seated upon their seats and the others are standing in between them. They will send their own Energy into the containers and above our heads, in this way their Energies are absorbed directly into the containers. It is also absorbed by you and me. So we can then transfer the Energies of Shiva & Shakti, Victory, Compassion, Divine Plan and Fearlessness, Empowerment, Protection from Great Silent Watcher into our own bodies, yours and mine, and from our bodies into the hands, and from our hands into the 5 Elements.

Now imagine that the Angels will then take each of these small containers and go by the Sacred Fire and pour them one by one into the Sacred Fire. First the Element of Earth goes in, and as it is poured into the Sacred Fire, Lord Shiva, Goddess Shakti, Victory, Goddess of Compassion, Goddess of Divine Plan and Great Silent Watcher pour their own Light over it and into the Sacred Fire. Element of Earth goes in, then the Element of Water goes in and the Deities pour their Energies over it. Then the Element of Fire goes in, the Element of Air goes in, finally the Element of Ether goes in. Once the Fire in the Sacred Fire is imbued with these five small containers that have received the blessing, then imagine a miniature image of Earth suspended above the Sacred Fire and imagine first all land masses of Earth receiving this blessing from the healed aspect of the Element of Earth to rejuvenate, to sustain, to raise the vibration for the Element of Earth across the globe.

**Then imagine the miniature Earth absorbing the Element of Water. The waters in the oceans becoming pure and pristine, the fresh waters of the world, becoming clear and cleansed and their**

**quality and quantity increasing so all the reservoirs are filled with fresh water that's potent and filled with Life Force Energy.**

At this point we can **invite the four Cosmic Guardians of Balancing, with the Cosmic Guardian for Balancing Life Force to pour the Energies and the Life Force that is most conducive for all the waters of Earth so all the creatures who live in the waters can thrive, all the fishes become healthy, all the mammals become healthy, all the flora and fauna that lives in the water becoming healthy, the coral reefs becoming regenerated and rejuvenated, seeing Lord Shiva & Goddess Shakti pouring their blessing, Goddess Victory, Goddess of Compassion, Guardian of Divine Plan and Great Silent Watcher pouring their own Energies as you and I continue to pray and pour our Energy from our hands to bless the waters of our world, the waters of Earth in all Dimensions and Realities.**

Then imagine that **the Fire rises up from the Sacred Fire and calms the Waters, the Earth and the Fire**, because Fire is a higher Element than Water and Earth. You know Fire can burn and reduce all the Waters. It can burn all living creatures on Earth on any piece of land, and yet Fire has its own consciousness, which when balanced it has a nurturing impact rather than a burning impact. Fire is a nurturing Element. Its job is to purify but not to destroy. So we want to bring balance back to Fire and in this case, out of the four that are Cosmic Guardians of Balancing I invite the Cosmic Guardian of Light & Dark to restore that balance because Fire is becoming more destructive than constructive, so the dark aspect of it is rising. It turns everything into a black chard, no good remains. So balancing the Light & Dark in the Element of Fire to reduce the forest fires, to reduce the rage that Fire carries on with on Earth, bringing the Element of Fire back to balance, Cosmic Guardian of Balancing the Light & Darkness with the other three supporting her, Cosmic Guardian of Hope, Cosmic Guardian of Life Force, Cosmic Guardian of Balancing Health & Abundance letting the Health & Abundance aspect in the Fire to rise up and to replace the destructive force that the Fire uses and this present time.

Now I ask you to imagine that the Air, **the Element of Air is being purified through the Sacred Fires that are permeating around the globe, the miniature aspect of the globe absorbing the goodness from the Sacred Fire and all the Health & Healing Elements that are poured into the Sacred Fire is causing the Element of Air to purify itself.** All the smog and the smoke and the carbon emissions being transmuted in the goodness of all the Energies, all the love that is pouring into the Sacred Fire and from the Sacred Fire permeating around the globe, and as the four base Elements begin to balance themselves, the Element of Ether is able once again to protect them, engulf them, empower them. You see the job of Ether is to empower, permeate with goodness and bring to life all the lower elements.

When the lower elements go awry, when they go out of balance, when they are off kilter, then the Element of Ether cannot protect them. So **when we offer the Balance back to the four base elements we are also empowering the Element of Ether to be what it was meant to be, the overall protector, the layer that goes over each of the other ones to make them shine, to make them productive, to make them give their best. The Element of Earth, Water, Fire and Air giving their best to the globe, to the body of Mother Earth, to the 5 Body System of Mother Earth, to the Light Body of Mother Earth.**

Ultimately see that **Goddess of Compassion is pouring her Pearlescent Peaching Cream and it is absorbed into the 5 Elements. Goddess Victory is giving her Platinum Light with Frosted Blue**

**which resembles that Aquamarine Blue except it has Platinum Shimmers and that gets absorbed. Guardian of Divine Plan gives her Warm Orange which makes everything warm and fuzzy. I give my Copper Gold for Love & Nurturance. You give your own love and whatever colors you wish to add and the Quality for which you wish to give. And you can choose from the existing ones or you can choose from something different.**

Think of what you wish to give....you can even give an offering from every Quality represented by all these Cosmic Guardians. **Great Silent Watcher gives her Turquoise Blue and the Higher Aspect, the Sky Blue Topaz Light. Lord Shiva offers White Light. Goddess Shakti offers Red Light. White for purity, Red for passion, to seal these Energies as all of us assembled here in the presence of Christ Maitreya, Sanat Kumara. And most importantly in the presence of our Beloved Mother Mary and Master Jesus, wish you happy entry into the New Year and a smooth journey through the year as you all evolve spiritually with Divine Mother standing by your side.** All these Beings pour their Love, their Sustenance, their Power to pave your path and to help you achieve above any limitation and beyond all expectation. **I offer you garlands of Love, Nurturance, Peace & Harmony. May your heart be filled with joy, may the path be smooth. May your loved ones make you proud, as you make me proud.**

I hold you in my own heart with great love. I ask you to envision this image as we move into the New Year and through the month of January, for anchoring these Energies for the 5 Elements, and for raising the vibration of Earth. What you do in the form of this meditation will become sustenance, a way for Earth to rise up and choose a better life for herself, and for all the species of souls that depend on her as their Mother.

I hold you in my own heart. So It Is.
