© FAGU 2015

Hello everyone this is Jim and welcome to this special edition of the 1-11-2016 Gateway Portal Channeling. I thank you all for being here and taking the time to offer yourself in this service. This is a rare and unique event. We traditionally don't have a January 1st Gateway Portal Channeling live event, and we've kind of been in a portal as we entered the beginning of 2016. A kind of a continuous portal of lots of Energies pouring down ever since the 1st of January, and we offer this to you live. And we'll post it on the website of course, and then you can go in and download it any time you wish. That will be posted later on tonight as usual.

Grounding meditation-Take a deep breath and envision yourselves standing on top of Uluru, and be aware that everyone that's on this call and that will listen to this session, at any time in the future; their Energy is here with us. And we're forming one group entity to magnify the Energies and the results of this session for the benefit of Earth and humankind and of all the kingdoms of Earth.

As you feel yourself grounded and anchored to Uluru let yourself glide into Uluru, sliding down and seeing the clay red rock surround you, holding you in its bosom and nurturing you. Feel all the static and rushing around of the day's events fade, and feel your body being cleansed and your Chakras being cleansed by this red rock.

Envision that the Hara Line, the Pillar of Light that extends from the bottoms of your feet all the way to the Core of Mother Earth, is illuminated. We wrap our roots from the bottoms of our feet and the tailbone all the way down around the Hara Line to wrap themselves around the Core Crystal.

We invite all the Cosmic Goddesses that have been working with us to wrap their Energies around us and wrap their roots around our roots. Finally we see the tree trunk forming around us and the roots from this tree trunk moving down and surrounding all of the roots of the Goddesses and our roots as they're wrapped around and held tightly to the Core Crystal.

You can visualize around you, the moss that forms on the outside of the bark of the tree trunk is an Emerald Green, and you can see around that Divine Mother's Plum Ray of Rejuvenation is forming, and as the two colors mix they form the Dark Red & Green of the Guardian of Earthly Abundance, and see that the tree trunk extends all the way up through the heavens to the Pool of Creation and spreads out in its branches and leaves into the Pool of Creation.

Now focus on the Core Crystal, and as all of our roots are wrapped around it, see the Amber colored Life Force Energy of Mother Earth moving up through the bottoms of our feet, all the way up through our

body, filling our Chakras, filling our 5 Body System and Light Body, and moving up all the way to the Pool of Creation and filling the Pool of Creation.

Visualize that Great Silent Watcher is standing there at the Pool of Creation and she pours her Turquoise Blue Light mixed with Gold into the Pool of Creation; Mother of the Cosmos pours her rich Dark Amber colored Light into the Pool of Creation; and Cosmic Guardian of Compassion's Pearlescent Peachy Cream colored Light pours into the Pool of Creation. They all begin to move down through the tree trunk, through the Antahkarana Cord- the Pillar of Light that extends from the top of your head all the way up through the tree trunk to the Pool of Creation. All those Lights come pouring into your Crown Chakra (on top of your head), move down through your body, all the way to bottoms of your feet down to the Core Crystal; mixing with the Life Force Energy of Mother Earth; and it comes up again, all the way up through the body, all the way up to the Pool of Creation. It pours down again and all the way up once more, through the bottoms of the feet all the way up to the Pool of Creation. Take a moment, feel those Energies pouring up and then pouring back down again.

Now we find ourselves, our consciousness in the Pool of Creation. Feel yourself floating in the Pool of Creation with all these Lights, all these Energies around you; you've absorbed and are resonating with the vibrations of each one of these Lights and each one of the Qualities of these Lights.

See two Angels standing on the side on the deck beside the Pool of Creation, and we jump onto the deck and the two trays are being held by our two Angels. We put on our ceremonial robes and cape, take our Scepters of Power and offer gratitude to these two Angels, and we see in the distance our Beloved Divine Mother.

At Divine Mother's Throne- We move towards Divine Mother sitting on her Throne. As we get closer she stands and raises her arms and the Copper Gold Light from Divine Mother pours out onto us.

We see standing around her Throne. All of the Cosmic Goddesses of the Divine Feminine are standing behind Divine Mother. Great Silent Watcher with her Scepter of Power held above everyone's head is pouring her Turquoise Blue Light. Thousands upon thousands of Silent Watchers and billions of Angelic Watchers surround us creating a sphere around us.

We see Lord Shiva & Goddess Shakti; Lord Shiva to one side, and Goddess Shakti to the other of Divine Mother. We kneel before Divine Mother with our Scepters held above our heads. I will give you a moment to say whatever it is you wish to say to Divine Mother and the entire entourage, whatever prayers you wish to offer as we begin the year 2016. I leave you here and the next voice that you hear will be that of our Beloved Nasrin. I wish you the best ever year, this coming year of 2016. So It Is.

2016- A year of Victory for all Divine Mother's children-adding Golden Brown Light to the Copper Gold to gain greater victory

Nasrin begins: 8: 56 min- Hello everyone and welcome to the first Gateway Portal Channeling of the year 2016.

There are a couple of things I would like to explain to you so we can together make it our New Year's resolution and carry it and its gifts with us through the year. One of those is **that Divine Mother has chosen to add a Golden Brown colored Light to her Copper Gold, and she explains to us that the**

Brown Golden Brown colored Light carries the Energies of this year. She has also explained to us that this year, the numbers of the year according to the teachings of Pythagoras and numerology that we work with at the foundation adds up to nine. Now to understand how that works out, $2 + 0 + 1 + 6 =$ it adds up to 9.

Nine is Divine Mother's own number; it is also Sanat Kumara's number. Sanat Kumara is our Planetary Logos. If you thought of one world leader, that would be him. His consciousness overlights the entire globe.

So this year we have the presence of Divine Mother and Sanat Kumara by our side. It would be good to make it our New Year's resolution to use this knowledge about Divine Mother and Sanat Kumara, and the fact that it is the year of their numbers to your resolution, and always **make sure in every petition, in every invocation, in every intention to call upon Divine Mother and ask her intercession, and ask her overlighting presence. And then in her presence call upon Sanat Kumara and ask him as the father for all of us, the father for our globe, to intercede on your behalf and to help with whatever decisions, ideas, designs and concepts you have in mind. If you don't have anything in mind but you just want to pray, then by all means pray to Divine Mother and ask Divine Mother to call upon Sanat Kumara on your behalf and request that Sanat Kumara be by your side.**

Why is it important to call upon Divine Mother? Because she's the mother of all mothers; she's even Sanat Kumara's mother. So you go to the highest, most loving, nurturing authority there is and you call upon that authority. Why is it important to call upon Sanat Kumara? Because he's the father for all of us, he is still the son to Divine Mother, and every child is supposed to listen and to obey the desires of his or her elders. And in this case Sanat Kumara would want to please Divine Mother. So if you went directly to him you're only using your own power to request a favor from him. If you go to Divine Mother and ask through her, you're using her motherly Energies and her intercession to then call upon Sanat Kumara for the work to be done. His Energy has great focus. His Energy is the substance of our reality. His Energy runs like the Life Force that runs through our reality, the 5 Elements. So it behooves us to call upon Divine Mother and through Divine Mother upon Sanat Kumara. Now take a moment and do just that before I take you to the next step.

Remember that throughout this year you can go before the Throne of Divine Mother in the same way that Jim directed you and stand before her and invoke her presence in whatever ideas, designs, thoughts, projects, concepts, intentions you would like to see accomplished. So that was number one. Number one, Divine Mother is the Master, the Deity whose Energy and whose number is the number for this year. So her Energy is prominent.

Now Divine Mother has told us something else about this year of 2016: for those of us who are doing your work and are walking on the path and are serving in this way- we are serving together- all of you by coming to these Gateway Portal Channelings, by reading the books, by listening to the previous channeling sessions, by participating in serving Divine Mother can benefit from this next gift that Mother gives us. That gift is that she has told us, for **those of us who are already on the path and doing this work, this year will also be a year of victory.** That means **Goddess Victory, an immensely potent and powerful Deity, who has been successful in everything she does for the past many hundreds of thousands of years is also available to us;** through the grace and intercession of Divine Mother and the fact that she has requested the presence of Goddess Victory.

Goddess Victory's number is eight, and eight is known universally to be the number for abundance. So as you do this work throughout the year and get deeper and more engaged in accomplishing the tasks on behalf of Divine Mother and serving in this way expect abundance to come to you, request abundance to come to you. Once again go to Divine Mother and request from her the backup of Goddess Victory.

If you turn number eight to its side it becomes the sign of infinity. That symbol is also part of Goddess Victory's alchemical tools, the sign of infinity which is one of the symbols of Goddess Victory's own symbology. It's one sign that she also uses to bring infinite abundance, to bring infinite victory, to bring infinite wisdom through herself to everyone who follows her, everyone who obeys her, everyone who serves her. So this will be for those of us who are gathered here today and continue to work together through the year, a year of victory. Expect projects that haven't been moving before to now begin to move forward for you. Expect things to start gaining momentum, and the way to make sure these things happen is to come before Divine Mother and request her supervision, her guidance, her intercession.

Now when I began this conversation I mentioned to you that Divine Mother has told us to add a little touch of Golden Brown to the Copper Gold which is her Signature Energy. So as you **imagine standing before her, envision that she's sending beams of Copper Gold Light that are now immersed in a Golden Brown overlighting Energy, Golden Brown Copper Gold. Imagine that she's sending these beams from her entire body to all of us. As I continue with this conversation you continue to imagine that you are being showered with the Golden Brown Copper Gold Light of Divine Mother. You can even imagine yourself being absorbed into these beams and magnetized inside Divine Mother's Body, and sit inside her bosom. Let your skin absorb this Golden Brown Copper Gold Light. Let your breath inhale this Golden Brown Copper Gold Light. Let your cells absorb, let your DNA structure become acquainted and the memories of all that you need to empower you to succeed in this year unfold.**

Become aware that **to one side of Divine Mother Goddess Victory stands sending her own Platinum Light with Frosted Blue. To the other side of her Sanat Kumara stands sending Fuchsia Pink Light. Sanat Kumara's Signature Energy is Fuchsia Pink. Goddess Victory's Signature Energy is Platinum with Frosted Blue. Goddess Victory has many different varieties of colored Lights. Her basic always goes to colored Light, is Platinum, and the Frosted Blue is for empowerment, to empower you to absorb the Platinum. And for now, imagine the two of them standing in front of you and giving you these Energies.**

Significance of colors and coloreds Lights- I want to explain to you the significance of colors and coloreds Lights. So as you are absorbing the Light from all three of these Deities I want to give you a quick reminder of the significance of using colors and using colored Lights.

In our world, in the 3rd Dimension, we use colors. **There are three primary colors, blue, red and yellow. All other colors that we experience come from some combination of these three primary colors.** For example when you mix blue and yellow you get green. When you mix red and yellow you get orange. When you mix blue and red you get purple or magenta depending on the combination. So the 7 colors of the rainbow which we experience are basically an extension of the three primary colors. Then of course we have white and we have black. You add white to anything it becomes lighter. For example

you add white to red it becomes pink. You add white to yellow it becomes a lemony yellow, and if you add more white it becomes a light beige, a creamy colored white or an off-white. You add white to blue and it becomes a baby blue. You add white to green and it becomes a baby green. So adding white to any color makes it lighter, in the same way adding black to any color makes it darker. For the most part, if you add just a drop of black it might just become darker, if you add more than that it either becomes a dark gray or the black basically consumes the other color and turns everything into a very dark gray or black. That's colors.

If you add the three primary colors together, if you add blue and yellow and red together invariably you get gray. Mixing those three basically turns all of them into neutral. Gray is a neutral color. Depending on what combination you use it could be a very light gray to a very dark gray. If there are more blues and reds in it, it would be a darker gray. If there's more yellow in it, it would be a lighter gray. So that's the energy of colors.

Colored Lights- in our world, colored lights have the significance of playing the role of a higher quality. Those qualities come from their higher aspect. So think of the colored Lights which these Deities carry as the Higher Self, or Higher Aspect of the colors which we use in our world. In the case of Lights, a lot of the rules and laws that apply to colors in our realm are also applicable to the Lights with some exceptions. For example, in the case of the Lights it's not necessarily true that there are only three primary colors. In fact in the case of the Lights there's only one primary color and that is Pure White Light. Everything that we experience in terms of colored Lights comes from Pure White Light. When Pure White Light is going into a prism and coming out fractured- out of the prism in the colors of the rainbow. So the 7 colors of the rainbow that you see in the air when on a rainy day the sun comes out and those colors of the rainbow become vivid and you see them from one end starting from magenta and purple going to blue and green and yellow and then turning into orange and red, and again from red to purple and magenta. That is the embodiment of Pure White Light that is coming from the rays of the sun being fractured through the prism of the rain. Now why is that significant? It's significant because **each of those lights which carry an aspect of Pure White Light also carry a Quality and this is why we talk about Sanat Kumara's Light for Earth being Fuchsia Pink, Divine Mother's Light for Earth being Copper Gold, or that she has decided for this year to add Golden Brown to her Copper Gold to make it more potent and powerful, more healing for us.**

When you understand the significance of colored Lights you can appreciate these gifts that they give us and the ways in which they shower upon us their colored Lights. You will then be in a position to use those Qualities more wisely and have an understanding of the significance of those colored Lights so when Jim or I say wrap yourself in the Pearlescent Peachy Cream of Compassion it would then make sense to you to understand that it's not an abstract thing out there but this Light of Compassion which is actually a complex variation of the 7 colors of the rainbow.

The seven lights of the rainbow are in fact an Energy coming to Earth and there are Guardians behind it who administers healing to each of us. One such being, her name is Goddess of Compassion; her Energy is Energy of Compassion. The Light is a Pearlescent Peachy Cream and that Light can come to each of us as we receive it, be embodied by each of us so it can administer healing upon us, and then through each of us it can be anchored on Earth. Thereby allowing us to be of service to Earth. This is the important part because you gain merits exponentially when you anchor the Energies on behalf of these Deities so that

others can benefit from it. You gain merits to begin with when you receive it and allow it to be administered to you and your own Energy begins to rejuvenate from it and that Quality begins to unfold in your life, in this case, the Energy of Compassion.

You will begin to have less judgment, you will begin to have compassion on other people, you will be able to put yourself in someone else's shoes without experiencing hardship, concern, division, annoyance, hatred, aggression, those are very important things to be able to accomplish in a world where we have become so polarized, where everybody is blaming everyone else for their plight.

Imagine how wonderful it would be when you are able to be neutral, to be in a position not to blame anyone else for anything and to not even blame yourselves for anything, just accepting things the way they are and living in a place where you feel safe, you feel secure, you feel compassionate, you feel overwhelmingly imbued and engulfed in the Energies of Compassion.

So this year Divine Mother is telling us that she wishes to give us the Energies of a Golden Brown. Now let's figure out where brown comes from. Brown itself is a complex color. The reason why it's complex is that it has a combination of primary and secondary colors. To get brown, first you have to mix the red and the yellow to get green, and then you have to mix the green and the red to get brown. So here are two layers deep of three colors being combined.

Now Divine Mother also wants to give us Gold. Gold itself is a higher level Light as is the Quality that Gold represents, the Quality that the color Gold represents as well the Quality that Gold, the Sacred Metal represents. Both the Sacred Metal Gold and the color Gold which carries Shimmering Golden Light in it are here to transmute negativity, that's the main objective of the Sacred Metal Gold, and the main objective of the color that emanates the Quality of that Sacred Metal Gold. Gold is a very highly evolved Sacred Metal. It's a highly evolved Light. The Shimmering Golden Light can penetrate into darkness and transmute darkness.

Now as I mentioned, the Qualities of Lights, colored Lights have similarities with qualities of colors with some exceptions. In our world if you add a drop of black to any other color it can make it darker but let that original color maintain its color, or it can consume it. **When it comes to Lights there's no such thing as black light. There's either Light or absence of Light. Darkness which is the closest thing to the color black is the absence of Light.**

So when it comes to Lights everything stems from Pure White Light; which goes into a prism, breaks into a fracture of 7 colored Lights. Those 7 colored Lights, we experience them as the same 7 colors of the rainbow as we do in our 3rd Dimension with the colors that we experience with our eyes. However, Pure White Light also goes through the prism and carries others colors on the side as well. Gold and Silver, Gold and Platinum- whether you use the Platinum part of the spectrum or the Silver part of the spectrum, both Platinum and Silver are Energies that soften up the harshness, while Gold penetrates into the darkness and releases, removes and transmutes negativity. Silver and Platinum fill that space with the Feminine Energy, with soft, smooth cloud like Ethereal Energies.

We attribute the color of Gold to the sun which carries the male Energy. We attribute Silver and Platinum to the moon which carries female Energies. The sun is a male Energy with Gold as its Signature Light, Gold & Yellow Light. The moon is a Shimmering Silver Platinum Light. So the two

play a role in the polarity of male and female or masculine and feminine, so you use the color of Silver Shimmering Light to bring in the Feminine Energy, to bring softness, to bring spreading of the Energies, and you do the same with Platinum, whereas with Gold you bring focus, the male Energy, it's laser sharp. It can penetrate deep and sharp into the darkness and bring in the Light. This is why Divine Mother has chosen the color Gold as one of the basic parts of her Signature Energy because for her to be able to help us and to pour her loving, nurturing Light upon us she needs that deep penetration that Gold provides.

Now why does she normally use the Copper? Copper also has a transmutational quality, but it also has a quality of removal of pain, removal of struggles. Copper has a tendency to bring to healing whatever it touches. Right now there are copper bangles and bracelets, anklets that people wear because they suffer from joint pain, they suffer from arthritis, they suffer from various ailments and copper has been proven to help with pain. Right now it is also scientifically shown that copper can transmute germs and prevent the spreading of germs around. So a lot of the hospitals are using the substance of the Sacred Metal that is called Copper, that is copper and are spraying it in spray form on surfaces or using sheets of copper as surfaces where people touch door handles, door knobs in public areas, handrails. In public areas in hospitals, in train station, in buses they are now using copper as a medium that prevents the spread of disease.

So again, why is Divine Mother using Copper as her Quality? Because it prevents the spread of germs, it prevents the spread of negativity. In our reality in the 3rd Dimension it's in the form of bacteria and virus. In higher dimensions for it to penetrate to our dimension so Divine Mother from her Throne in the 122nd can reach to us in the 3rd, she uses the Quality of the Sacred Metal Copper and its ability to absorb the negativity to itself and make way for healing to use it as her Signature Energy.

So originally when we were introduced to Divine Mother she requested that we use her Copper Gold Light as the Light which she sends to us, the Light which we receive from her and bathe in to raise our own vibration to be in her Energy. So make it your New Year's resolution and continue throughout the year, to always see yourself surrounded by the Copper Gold of Divine Mother. On top of that for this year of 2016 be reminded that she has given us a new dimension to her Copper Gold, adding the Golden Brown. Why is she giving the Golden Brown a chance for this month, for this year, for the year 2016? It is because the energetic vibration of the year vibrates to that Golden Brown. The coming together of that Golden Brown mixed with her Copper Gold and the Energy of this year is a good one.

Think of a year from its beginning from 1st of January to 31st of December as an entity, an Energy, a Being. Think that this Being, a little Angel that is the container, is the guardian for the year 2016. In this case this Angel is born at the stroke of midnight when it becomes 12:01 on 1st of January and then it goes through and it ages. The lifespan of this little Angel is one year, 365 days. In the case of 2016 it's 366 days because this is a leap year. So that's the life span, and I always say in the beginning of the New Year, when the year is newborn, it is pure, it is innocent, it is clean, it is like a gift that you just take out of a gift box.

That brings me to the second thing that I want to tell you about this year and the resolutions that we should make together. It's really easy to meditate, it's really easy to pray when the year is new, when the year hasn't seen pain and struggle and misery and hunger and starvation and storms and natural or manmade disasters, and the year is pure and innocent. At the beginning of each year I am so amazed at

how easy it is to meditate and how much my body wants me to just sit and meditate and listen to the mantras and basically do nothing except be with Divine Mother and pray. And towards the end of the year I am so amazed at how heavy the year becomes and how intense my body feels. I am bursting at the seams, I gain weight, I feel I can't be motivated, I can't do anything; even prayer is hard. And every time that I hear from one or the other of you guys telling me what a hard time you're having towards the end of the year I keep saying, say the prayers because the prayers are the only way we can penetrate into the quagmire of the darkness and the pain that the year has picked up. Imagine that that Angel who comes to life at the stroke of midnight in each New Year has lived its life by the time it gets to be middle of December. It's at its most fragile point because it only has hours and minutes to live. Its life is at its completion point, it's at its old age, and we are embraced by that Angel who can't wait to be done and that's why it gets so hard.

So what I want to suggest as we enter this New Year, as we're only a few days into the first month of the year, and we move into the first quarter, **make a point of praying as much as possible, meditating as much as possible, bathing in this Copper Gold mixed with Golden Brown colored Light, and sit with Divine Mother and absorb as much of it as you can because the more you do now the easier the rest of the year becomes. Do the easy part of the job now while it is easy to do it and save it, save those merits for the end of the year where it gets harder.**

Each year as the Energy of the year is new, as the entity of the year, that Angel of the year is new, you pave the path for what you want to accomplish during the year. You pave the path to fully accomplish all that you intend by the time of completion. Imagine what a great outcome it would be if by the time you reach the first quarter you are more than half way there. And how can you do that? You can do it by prayer, you can do it by invocation, you can do it by meditation, and when I say you can do it by prayer, **there's two ways that you pray.**

One is that you sit and you **keep asking and praying for the things that you feel you need to accomplish during the course of the year, calling upon Divine Mother's intercession.** Mother this year I want to complete this course of training. Mother this year I want to plant my vegetable garden and get into gardening. Mother this year I want to learn this language. This year I want to give a hundred hours of selfless service towards a charitable foundation. This year I want to lose 12 pounds. This year I want to, whatever it is that you want to accomplish, from the most simple, and what may seem trivial to the most complex and wishful thought that may or may not unfold in your own mind, that can be your prayer. That's one way of praying. To me that's praying to set intentions and to me setting intentions and praying are the same thing, or at least they are part of the same complex.

Now here's another way you can pray. **In this second way, you offer everything to Mother, and you say I pray for Divine Mother, I pray to Divine Mother for Divine Mother, and I pray that Divine Mother wills for me the highest and the best things, and in order for those prayers to gain momentum I'm going to offer the 108 names of Goddess Lakshmi, I'm going to offer 500 rounds of the prayer of the rosary. I'm going to offer saying the name of Divine Mother a thousand times.** I'm going to offer listening to spiritual music, I'm going to listen to the sounds of Jupiter, listen to the sounds of Mars.

There's a series of CDs I believe put out by NASA that are sounds of the humming sounds of various planetary bodies, and it really is wonderful to meditate to them. I'm going to listen to Gregorian Chant.

I'm going to listen to the sounds of dolphins. All of those are a form of prayer because you go to a state of deep meditation where you feel bliss, you feel joy, you feel gratitude. When you come out of that feeling, when you come out of that meditation, whether you induce it to, by listening to prayers or saying the prayers yourselves, when you come out of it you carry that Energy with you for part of the day, all of the day, sometimes you carry it with you for the whole week.

Now I'm going to add to this list one other very important suggestion and that is doing one of the guided meditations, doing your grounding meditation, listening to Jim's voice, going up to the Pool of Creation, sitting in the Pool of Creation and bringing all of those Cosmic Guardians and praying with them, to them, with them to Divine Mother.

Next step is, **going to the Pool of Creation, coming out and standing right where we are, standing right now and seeing yourself bathe in the Copper Gold mixed with Golden Brown. Seeing Goddess Victory to one side, Sanat Kumara to the other side, and just sitting there and bathing in those Energies. Going inside her bosom, sitting in there and imagining that you are holding a prayer of rosary beads and you're saying Divine Mother, Divine Mother, Divine Mother, Divine Mother, Divine Mother, Divine Mother.** It might take six of those before you feel the bliss, it might take a hundred of those before you feel the bliss, you will feel the bliss. If you don't feel the bliss the first time and the second time, you will feel it the third, the fourth and the fifth, but every time you do it you gain merits and those merits go towards everything you need for the rest of the year.

When we take one step towards these Deities, especially Divine Mother, she takes a hundred steps towards us. That's a given. That has been proven to me for myself, and in this lifetime for those of you who have allowed me to be privy to your lives. You take up her name, you take up the joy of standing in her presence, she will fill your heart, your mind, your body, your soul, your spirit with so much love, so much joy, you would be a different person instantaneously. There's great joy in experiencing yourself in her presence. There's great joy in experiencing yourself absorb that Golden Brown Copper Gold Light, and if you can get to that point where you absorb it and pray at the same time, then you are mixing the two suggestions that I have put out to you, the two ways of praying. 1: which is setting intentions 2: which is meditating.

That's why I say doing one of these meditations, the guided meditations that Jim and I offer to you through the Mystery School, whether you go to the Gateway Portal Channelings or those of you who take the courses and go and review one of the courses that you already have in your folder. It just gives you so much ammunition to build a future of joy and pave the path for her to walk ahead of you and show you the way. Because when you are exposed to the Energies of Divine Mother in these meditations you are not only meditating, you are also praying, you're not only praying for yourself but you are also serving multitudes and masses. So you gain merits for being in her presence, you gain joy, peace, harmony, prayers answered because you are in her presence.

If you have earned the merits to be in her presence then obviously she wants to make things happen for you, otherwise you wouldn't be in her presence. At the same time you gain merits exponentially for receiving her Energies through your body, your 5 Body System and becoming an antenna of her Energy while you're receiving from her and transmitting to all the others. While you're receiving from her and anchoring it to Earth, while you're receiving from her and touching everyone that you cross paths with. They may never know that their lives changed because of you. They may never know they went to the

movie theater and they sat on the seat that you had sat before them. They may never know that they stood at the same point, passing on the shelves of a grocery store that you had paused to pick up something from the shelf, but something happened to them that changed their lives, but Mother knows that you were the instrument for changing the lives of people you didn't even see eye to eye, you didn't even touch physically, but you touched them to the core of their beings, and for that Mother will give you the merits. She will give you the merits for the rest of this lifetime and beyond. She will see to it that everything will line up for you.

I was reading a little book that is Jim's by Sri Aurobindo, a devotee of Divine Mother who himself and his wife, known as Sweet Mother were Saints, they were highly evolved living Masters but the two of them were devoted to Divine Mother, and they wrote and talked about Divine Mother and they blessed people, touched people, transferring the Energies of Divine Mother. Aurobindo in this little book that is called "The Mother", it's a tiny little book. He says "Divine Mother would not go to anybody's house if there is chaos, if there is negativity, if there is hatred, if there is greed, if there is meanness. She will only knock on the doors of people who are open hearted, people who are willing to receive her. She will only embrace people who embrace her Light, who have the goodness within them to receive her loving compassion.

His words are much more eloquent than mine but this is what I got from the words of Sri Aurobindo and it made me cry, because the thought in my mind and heart was: how blessed are we that she not only comes to our homes, to our hearts, but she makes us the instruments of her will, her work? She allows us to do her work for her. How blessed are we? How special are we to have gained the merits to serve her in these ways in this lifetime? How many lifetimes must we have done good work to have earned the merit to be here today? We look around us and the world is in extreme chaos but we are fortunate enough to be able to be neutral. We are fortunate enough to be the instrument of her love, her nurturance, her Life Force being spread throughout our world. We are the antenna for receiving and transmitting her Light to our world. How special is that.

So let's make it our New Year's resolution that we pray, that we bathe in the Copper Gold Golden Brown colors of Divine Mother. That we give our ego, our fears, our negativity, our insecurities all to her and ask her to wash it off, wash it away with her Golden Brown Copper Gold Light, and keep washing it and keep making us more pure, more receptive to her loving nurturance, peeling those layers, making us more pure, making us shine even brighter, making us the element the instrument of her love, of her will.

Sometimes she says in jest but I know she means it. She says you take care of my work; I'll take care of yours. And when she says that, I know she's saying, I take care of your kids, I take care of your grandkids, I take care of your husband, I take care of the foundation, I take care of everyone who participates in the work of the foundation, I take care of the books, all you need to do, you just take care of me. You sit and you pray and you talk to me. You say the prayers, you take a walk and you offer that walk to me, you cook some food and as you're cooking, as you're chopping the ingredients you just say Divine Mother, Divine Mother, Divine Mother. You put that food on the table and you say I offer this food, I offer this feast to Divine Mother. You go grocery shopping and as you're paying you're thanking me for the ability to have bought these groceries, for the ability to have chosen good food, to be able to offer it to me, to other Deities, that is received. I'll take care of you because you are taking care of me,

and honestly that's all I'm doing. When I take care of her it's not like I can release her pain or her worries or I can give her advice, none of us can, but we can do a lot. We can take a shower and under the shower say Divine Mother, Divine Mother, Divine Mother.

One of the members of this group said, "*Nas will you make a Divine Mother prayer bead for me. I have a whole bunch of them but none of them are the Divine Mother one.*" I said I will make it but it will be awhile. So she wrote back and she said I can't say the prayers unless I have that rosary bead. And my response was, don't wait for the rosary beads, don't find for yourself excuses for not doing it. You don't need an external object to bring you closer to Divine Mother. You need to be close to Divine Mother without any preps and tools and gadgets. How hard is it to say Divine Mother, Divine Mother, Divine Mother under your breath wherever you are, whatever you're doing? How hard is it to keep thinking of her? How hard is it to wind yourself at night when you go to sleep to say, thank you Mother, I love you Mother, I bathe in your Copper Gold Light, I breathe your Copper Gold Light, I live in your Copper Gold Light?

Recently she said, "*Pray for me*" and I said, "*Mother who do I pray to in order to pray for you?*" She said "*pray to me*". I said, "*Mother, how do I pray for you?*" She said, "*you pray for me just by saying I pray to Divine Mother.*" And I said, "*Mother, what do I pray for?*" And she said, "*I'm not going to tell you what you pray for, I know what you're praying for. You don't need to know what you are praying for. You don't need to know my needs. You don't need to carry that burden.*"

So, I came to Jim and I said, "*Divine Mother is asking that we pray for her*", and he said more or less the same thing that I said. He said, "*how, how do we do that?*" I said "*basically we say, I pray to Divine Mother for Divine Mother.*" Now until the moment that I said that I really hadn't thought of it that way, like this is a mantra, this is a prayer. **I pray for Divine Mother to Divine Mother. I pray to Divine Mother for Divine Mother.** So a few hours later Jim came back and said, I don't know what the number was but he said, "*I said it this many hundreds of times.*" It didn't take him long. He said, "*I just decided that I'm going to let that run in the back of my mind and I kept saying it and kept saying it*" and then the next day he said "*all night I'd wake up and I was saying I pray to Divine Mother for Divine Mother;*" and I realized that is a form of prayer. You see, it is as simple as that.

Sometimes we think, who am I to pray for Divine Mother? But if she thinks that we can, and our prayers make a difference, who are we not to. And surely if we have earned the merit for her to want to knock on our doors, if we have reached the point where she comes to us and says pray for me, then who are we to question her wisdom. Because if we say who am I to pray for you, basically what we're saying is, are you for real? You want me to pray for you? I'm not good enough to pray for you. So basically we're telling her that we know more than she does.

If she wants us to pray for her she knows that we can be a force, we can make a difference. We certainly can make a difference in her life, for her intentions and what she wants to accomplish on our behalf, otherwise she wouldn't waste her time telling us to pray, to pray to her for her. She is the highest authority, she is the creative force. From her all the Deities come. To her all the Light returns. All the Deities take the Lights and the Qualities that those Lights represent and with it they create all manifest creation. She's asking us to pray for her, and in order to pray for her we have to go to her as the highest authority. There is an aspect of her which is nonmanifest but we don't know that aspect. We only know the aspect that has taken form and is communicating with us. So we go to that aspect and we pray to that

Being and we say I'm here to pray for you because I love you, because I want to serve you, and because you have asked me to and I trust that you know what you're doing. Your will be done.

Take a moment before we close this session and **see Divine Mother, and get absorbed into her bosom and feel her Golden Brown Light overlighting her Copper Gold. Feel her heart beating with love for each of us, for this world we live in, for this Earth who's going through her growing pains, for the consciousness of all souls who are also going through their growing pains, for the paradigm that is shifting to raise the consciousness of all souls.**

As we each envision ourselves sitting in her bosom, let's pray to her for her, and let's make it our 2016 resolution that everything we do, everything we say, everything we think be offered as a garland, as a prayer at her feet. We pray to her for her, and we bathe in the Golden Brown Copper Gold Light of Divine Mother and we bless her in this year of 2016, and we pour out from our own hearts the same Golden Brown Copper Gold Light and offer it at her feet.

Let your Energies mix with her Energies, and then offer her back this Light, this beautiful Light of purity which she has offered us as the container of this year, a baby Angel that is only 11 days old as we speak. Let's offer her this pure and innocent Angelic Being, and let's ask her that we can maintain the purity of heart, mind, body and soul throughout this year.

Let's **take the hem of her robes and invoke her to help us trust her in all our endeavors; trust her without limitation, without fears, without involvement of our ego, without involvement of the individual personality aspects. Let us call her to give us the ability to express and experience unconditional love and acceptance, unconditional love and acceptance of her.** If we can get to a point where we can express and feel unconditional love and acceptance towards Divine Mother we will be able to experience that towards ourselves, which then means we can live feeling safe and secure within these bodies because we and her are enough, each of us individually backed by her bathing in her love is enough. We don't need other people's love, and when we don't hook ourselves to anybody, they give it unconditionally because we're not begging it, we're not enabling them, we're not demanding it, we're being neutral.

Have you noticed when you desperately want something it never happens? When you go into that neutral place where you say ah if it happens, thank you, if it doesn't I will survive. That's when it happens.

So let's take the hem of her robes and say,

“Mother give me your grace so I can have unconditional love, unconditional acceptance towards you. Let me experience your unconditional love, unconditional acceptance. Teach me so I can then experience that and spread that experience towards myself and everyone else, and I offer that to you. I pray to you for you. Every breath that I take from this moment until the container of this year ends is offered to you as a prayer for you. Every action that I take through this year is offered to you as a prayer to you for you. Every thought that I think is a prayer for you to you. Let each of those thoughts be filled with love and joy. Let each of those actions be filled with victory. Let each breath be filled with health and wholeness, rejuvenation, renewal, regeneration. Let me move beyond my own limitations and expectations. Let me be the embodiment of your will and accomplish above and beyond all limitations and expectations, even beyond your expectations. Let me please you beyond your

expectation of what I can achieve and accomplish. This is my prayer. This is my gift to you our Beloved Divine Mother, for this entire year. This is our resolution. We thank you for all you have given us in all these years, in all these lifetimes, and all that you will continue to give us, all that is beyond our dreams and imaginations. We ask you to continue to walk ahead of us, to carry us in your bosom, to make us compassionate, to teach us to serve you in even greater ways than we have done so far, and we ask this in the presence of Goddess Victory and our Beloved Sanat Kumara, the father for our globe. So It Is.”

You may stay and say your personal prayers for as long as you wish until we meet again next month. May this be the best year yet for all of us.

So It Is.
